Report on Microsoft Excel workshop

A comprehensive Microsoft Excel workshop, led by Meenakshi Verma, was conducted at the MIT Commerce Department from July 22 to July 26, 2024. The workshop spanned five days, running from 10:00 AM to 4:00 PM each day. Aimed at enhancing participants' proficiency in Excel, the sessions were designed to cater to both beginners and intermediate users.

Workshop Objectives:

1. To provide participants with a solid understanding of Microsoft Excel's fundamental features.
2. To explore advanced functionalities and tools within Excel.
3. To enable participants to apply Excel skills to real-world data management and analysis scenarios.

The Microsoft Excel workshop, conducted by Meenakshi Verma, provided a comprehensive learning experience that empowered participants with both fundamental and advanced Excel skills. The hands-on approach and real-world application exercises ensured that participants could effectively use Excel for various data management and analysis tasks. Feedback from attendees was overwhelmingly positive, with many appreciating the practical insights and the instructor's clear, methodical teaching style. The workshop successfully met its objectives, equipping participants with valuable tools to enhance their productivity and data management capabilities in their professional roles.

Concluding Remarks

Department of Business Administration and commerce has organized a certificate course named **"Microsoft Word: Basic & Advanced"** on 11-15 March, 2024 for the students of B.Com. Mr. Asim Rizvi, the trainer told the students about the basics of MS Word, working with documents header & footer, basic text editing, style paragraph formatting, working with pictures, usage to table, mail merge, proofing, printing of document & recording of macros. The basic objective of this course was to enable students handy & familiar with MS Word so that they can fit in the contemporary business environment.

The program ended with the distribution of certificates to all the participants by the Principal.

Thanks

Dr. Sandeep Kapoor

HOD-Commerce

Dear Students,

This is to inform you that the Zenith Training is scheduled from **29th June 2023 to 5th July 2023**. It will focus on the placement oriented training in order to clear the first phase of the written test during placement. The trainers will be external and they are highly skilled as they will teach you the skills through which you can easily crack the first phase.

Note: It's mandatory for all the students to attend and maintain 100% attendance.

Thanks and Regards,

RETROFITTING TECHNIQUE Course Contents:

- **Retrofitting**
- **Need of Retrofitting**
 - ✓ Structural cracks
 - ✓ Damage to structural members
 - ✓ Excessive loading
 - ✓ Errors in design or construction
 - ✓ Modification of the structural system
 - ✓ Seismic damage
 - ✓ Corrosion due to penetration-honeycombs
- **Methods of Retrofitting of Building**
 - ✓ Adding New Shear Wall
 - ✓ Adding Steel Bracing
 - ✓ Wall Thickening Technique
 - ✓ Base Isolation Technique
 - ✓ Mass Reduction Technique
 - ✓ Jacketing Method
 - ✓ Fiber Reinforced Polymer (FRP)
 - ✓ Epoxy Injection Method
 - ✓ External Plate Bonding
- **Factors affecting in selection of Retrofitting of Building**
- **Benefits of Retrofitting of Building**

Contents

Certification Program on "Revit Architecture"

Day 1-2: Introduction to Revit

- Session 1 (Day 1):
 - Overview of Building Information Modeling (BIM)
 - Introduction to Revit interface and navigation
 - Understanding the Revit workspace: ribbons, panels, and views
- Session 2 (Day 2):
 - Creating a new project in Revit
 - Basic drawing and editing tools
 - Understanding Revit's parametric modeling approach

Day 3-4: Building Elements

- Session 3 (Day 3):
 - Working with basic building elements: walls, doors, and windows
 - Placing and modifying walls
 - Adding and customizing doors and windows
- Session 4 (Day 4):
 - Creating floors and roofs
 - Understanding floor and roof properties
 - Introduction to the Revit family editor for creating custom elements

Day 5-6: Views and Annotation

- Session 5 (Day 5):
 - Working with views: floor plans, elevations, and sections
 - Creating and managing different views
 - Introduction to 3D views and navigation
- Session 6 (Day 6):
 - Adding annotations: dimensions, text, and tags
 - Creating schedules for elements
 - Managing visibility and graphic display options

Day 7-8: Advanced Modeling Techniques

- Session 7 (Day 7):
 - Creating complex geometry with Revit's modeling tools
 - Using reference planes and constraints
 - Introduction to Revit's massing environment
- Session 8 (Day 8):
 - Exploring advanced modeling techniques: curtain walls, stairs, and railings
 - Customizing and refining complex elements
 - Understanding the implications of model integrity and performance

Day 9-10: Construction Documentation

- Session 9 (Day 9):
 - Introduction to construction documentation in Revit
 - Setting up sheets and title blocks
 - Placing views onto sheets and organizing documentation
- Session 10 (Day 10):
 - Detailing and annotating construction documents

- Adding dimensions, notes, and symbols
- Generating and exporting drawing sets for construction

Day 11-12: Collaboration and Coordination

- Session 11 (Day 11):
 - Introduction to Revit's collaboration features
 - Understanding worksharing and team collaboration
 - Coordinating models with linked files and references
- Session 12 (Day 12):
 - Reviewing and resolving conflicts with clash detection
 - Exporting and importing Revit files to/from other formats
 - Overview of BIM coordination tools and workflows

Day 13-14: Rendering and Visualization

- Session 13 (Day 13):
 - Introduction to rendering in Revit
 - Applying materials and textures
 - Setting up lighting and rendering settings
- Session 14 (Day 14):
 - Rendering a project scene
 - Post-processing and enhancing rendered images
 - Exporting renderings for presentations and marketing materials

Contents

Certification Program on "STAAD Pro"

Day 1-2: Introduction to STAAD Pro.

- Session 1 (Day 1):
 - Overview of Building Information Modeling (BIM)
 - Introduction to STAAD Pro. interface and navigation
 - Understanding the STAAD Pro. workspace: ribbons, panels, and views
- Session 2 (Day 2):
 - Creating a new project in STAAD Pro.
 - Basic drawing and editing tools
 - Understanding STAAD Pro.'s parametric modeling approach

Day 3-4: Building Elements

- Session 3 (Day 3):
 - Working with basic building elements: walls, doors, and windows
 - Placing and modifying walls
 - Adding and customizing doors and windows
- Session 4 (Day 4):
 - Creating floors and roofs
 - Understanding floor and roof properties
 - Introduction to the STAAD Pro. family editor for creating custom elements

Day 5-6: Views and Annotation

- Session 5 (Day 5):
 - Working with views: floor plans, elevations, and sections
 - Creating and managing different views
 - Introduction to 3D views and navigation
- Session 6 (Day 6):
 - Adding annotations: dimensions, text, and tags
 - Creating schedules for elements
 - Managing visibility and graphic display options

Day 7-8: Advanced Modeling Techniques

- Session 7 (Day 7):
 - Creating complex geometry with STAAD Pro.'s modeling tools
 - Using reference planes and constraints
 - Introduction to STAAD Pro.'s massing environment
- Session 8 (Day 8):
 - Exploring advanced modeling techniques: curtain walls, stairs, and railings
 - Customizing and refining complex elements
 - Understanding the implications of model integrity and performance

Day 9-10: Construction Documentation

- Session 9 (Day 9):
 - Introduction to construction documentation in STAAD Pro.
 - Setting up sheets and title blocks
 - Placing views onto sheets and organizing documentation
- Session 10 (Day 10):
 - Detailing and annotating construction documents

- Adding dimensions, notes, and symbols
- Generating and exporting drawing sets for construction

Day 11-12: Collaboration and Coordination

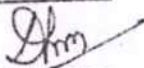

- Session 11 (Day 11):
 - Introduction to STAAD Pro.'s collaboration features
 - Understanding worksharing and team collaboration
 - Coordinating models with linked files and references
- Session 12 (Day 12):
 - Reviewing and resolving conflicts with clash detection
 - Exporting and importing STAAD Pro. files to/from other formats
 - Overview of BIM coordination tools and workflows

Day 13-14: Rendering and Visualization

- Session 13 (Day 13):
 - Introduction to rendering in STAAD Pro.
 - Applying materials and textures
 - Setting up lighting and rendering settings
- Session 14 (Day 14):
 - Rendering a project scene
 - Post-processing and enhancing rendered images
 - Exporting renderings for presentations and marketing materials

Instrumentation training program

Dear Students,

We are pleased to announce a 4-day training program on instrumentation techniques training from 04/03/2024 to 07/03/2024 in the Department of Chemistry, MIT. This hands-on training will enhance your practical skills and gain knowledge from highly experienced faculty. It is mandatory for all the students of 2nd and 3rd year to participate in this training program. Participation certificates will be provided after the successful completion of this training.

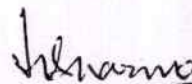

Details:

Dates: 04/03/2024 to 07/03/2024

Concluding Report

The 4-day analytical project focused on understanding and applying various instrumentation techniques essential for accurate data collection and analysis. The objective was to evaluate and refine the use of these techniques to ensure precision and reliability in future applications.

On Day 1, an overview of the instrumentation techniques was conducted, focusing on the principles, operation, and applications of key instruments, such as spectrophotometers, chromatographs, and mass spectrometers. Initial hands-on training provided participants with foundational knowledge of how these instruments work and their role in scientific analysis.

Day 2 involved practical sessions where each technique was applied to real-world samples. Calibration of instruments was a critical step on this day, ensuring that the devices provided accurate and reproducible results. Attention was given to optimizing conditions such as wavelength selection for spectrophotometry and flow rates for chromatography, as these factors significantly affect measurement accuracy.

On Day 3, troubleshooting and maintenance procedures were covered. Participants learned how to identify and resolve common issues encountered during instrumentation analysis. This included handling instrument malfunctions, ensuring proper maintenance schedules, and understanding the importance of regular calibration to avoid errors in measurements.

The final day, Day 4, was dedicated to data interpretation and report generation. Using the data collected from the instruments, participants analyzed the results, comparing them with expected outcomes. The importance of ensuring proper documentation and maintaining traceability of measurements was emphasized. The day concluded with a summary of the techniques learned, highlighting the best practices for implementing them in future projects.

REPORT

Summer Training Program in Analytical Instrumentation Techniques

The Summer Training Program on Analytical Instrumentation Techniques was conducted by Department of pharmacy, MIET college for 4 Days. It aimed at providing participants with comprehensive knowledge and hands-on experience in using advanced analytical instruments. The program focused on the operation, principles, applications, and troubleshooting of various analytical techniques used in scientific and industrial laboratories.

The main objective of this program is to familiarize participants with the working principles of various analytical instruments. This Training will provide practical exposure to instrumentation techniques used in chemical analysis, material testing, environmental monitoring, and quality control.

The program covered a wide range of topics related to the operation and application of different types of analytical instrumentation.

Spectroscopic Techniques:

- **UV-Visible Spectroscopy:** Principles, instrumentation, and applications in chemical analysis, pharmaceuticals, and environmental studies.
- **IR Spectroscopy (Infrared Spectroscopy):** Working principle, instrumentation, sample preparation, and applications in identifying functional groups.
- **NMR Spectroscopy (Nuclear Magnetic Resonance):** Basic theory, types of NMR (1D, 2D), and its applications in structural determination of organic compounds.
- **Fluorescence Spectroscopy:** Principle, applications in quantitative analysis, and comparison with UV-Visible spectroscopy.

Chromatography Techniques:

- **Gas Chromatography (GC):** Principle, instrumentation, methods of analysis, and applications in detecting volatile compounds.
- **High-Performance Liquid Chromatography (HPLC):** Types of columns, detectors, method development, and applications in food, drug, and environmental testing.
- **Thin-Layer Chromatography (TLC):** Principle, method of operation, and applications in qualitative analysis.

Mass Spectrometry (MS):

- Basic theory, components of a mass spectrometer, ionization techniques (e.g., ESI, MALDI), and applications in molecular structure determination.

Electrochemical Analysis:

- **Potentiometry, Voltammetry, and Coulometry:** Working principles, instrumentation, and applications in detecting trace metals and other ions in environmental and clinical samples.

Key Instrumentation and Techniques Used:

- UV-Visible Spectrophotometer
- HPLC System
- Fourier Transform Infrared (FTIR) Spectrometer
- Atomic Absorption Spectrophotometer (AAS)
- Data interpretation techniques

Conclusion: The Summer Training Program in Analytical Instrumentation Techniques successfully met its objectives by offering a rich blend of theoretical knowledge and practical exposure to modern analytical tools. The program enabled participants to familiarize themselves with the latest advancements in instrumentation, which are crucial for various research, industrial, and environmental applications. The skills and knowledge gained during this program will serve as a strong foundation for future professional growth in scientific fields requiring analytical instrumentation expertise.

Concluding Report

The 8-day training program from 15/05/2024 to 24 /05/2024 on analytical chemistry has been a transformative experience, equipping participants with essential theoretical knowledge and practical skills. The program encompassed a wide range of topics, including sampling techniques, spectroscopic methods, chromatography, titrimetric analysis, and advanced instrumental methods like HPLC and GC-MS.

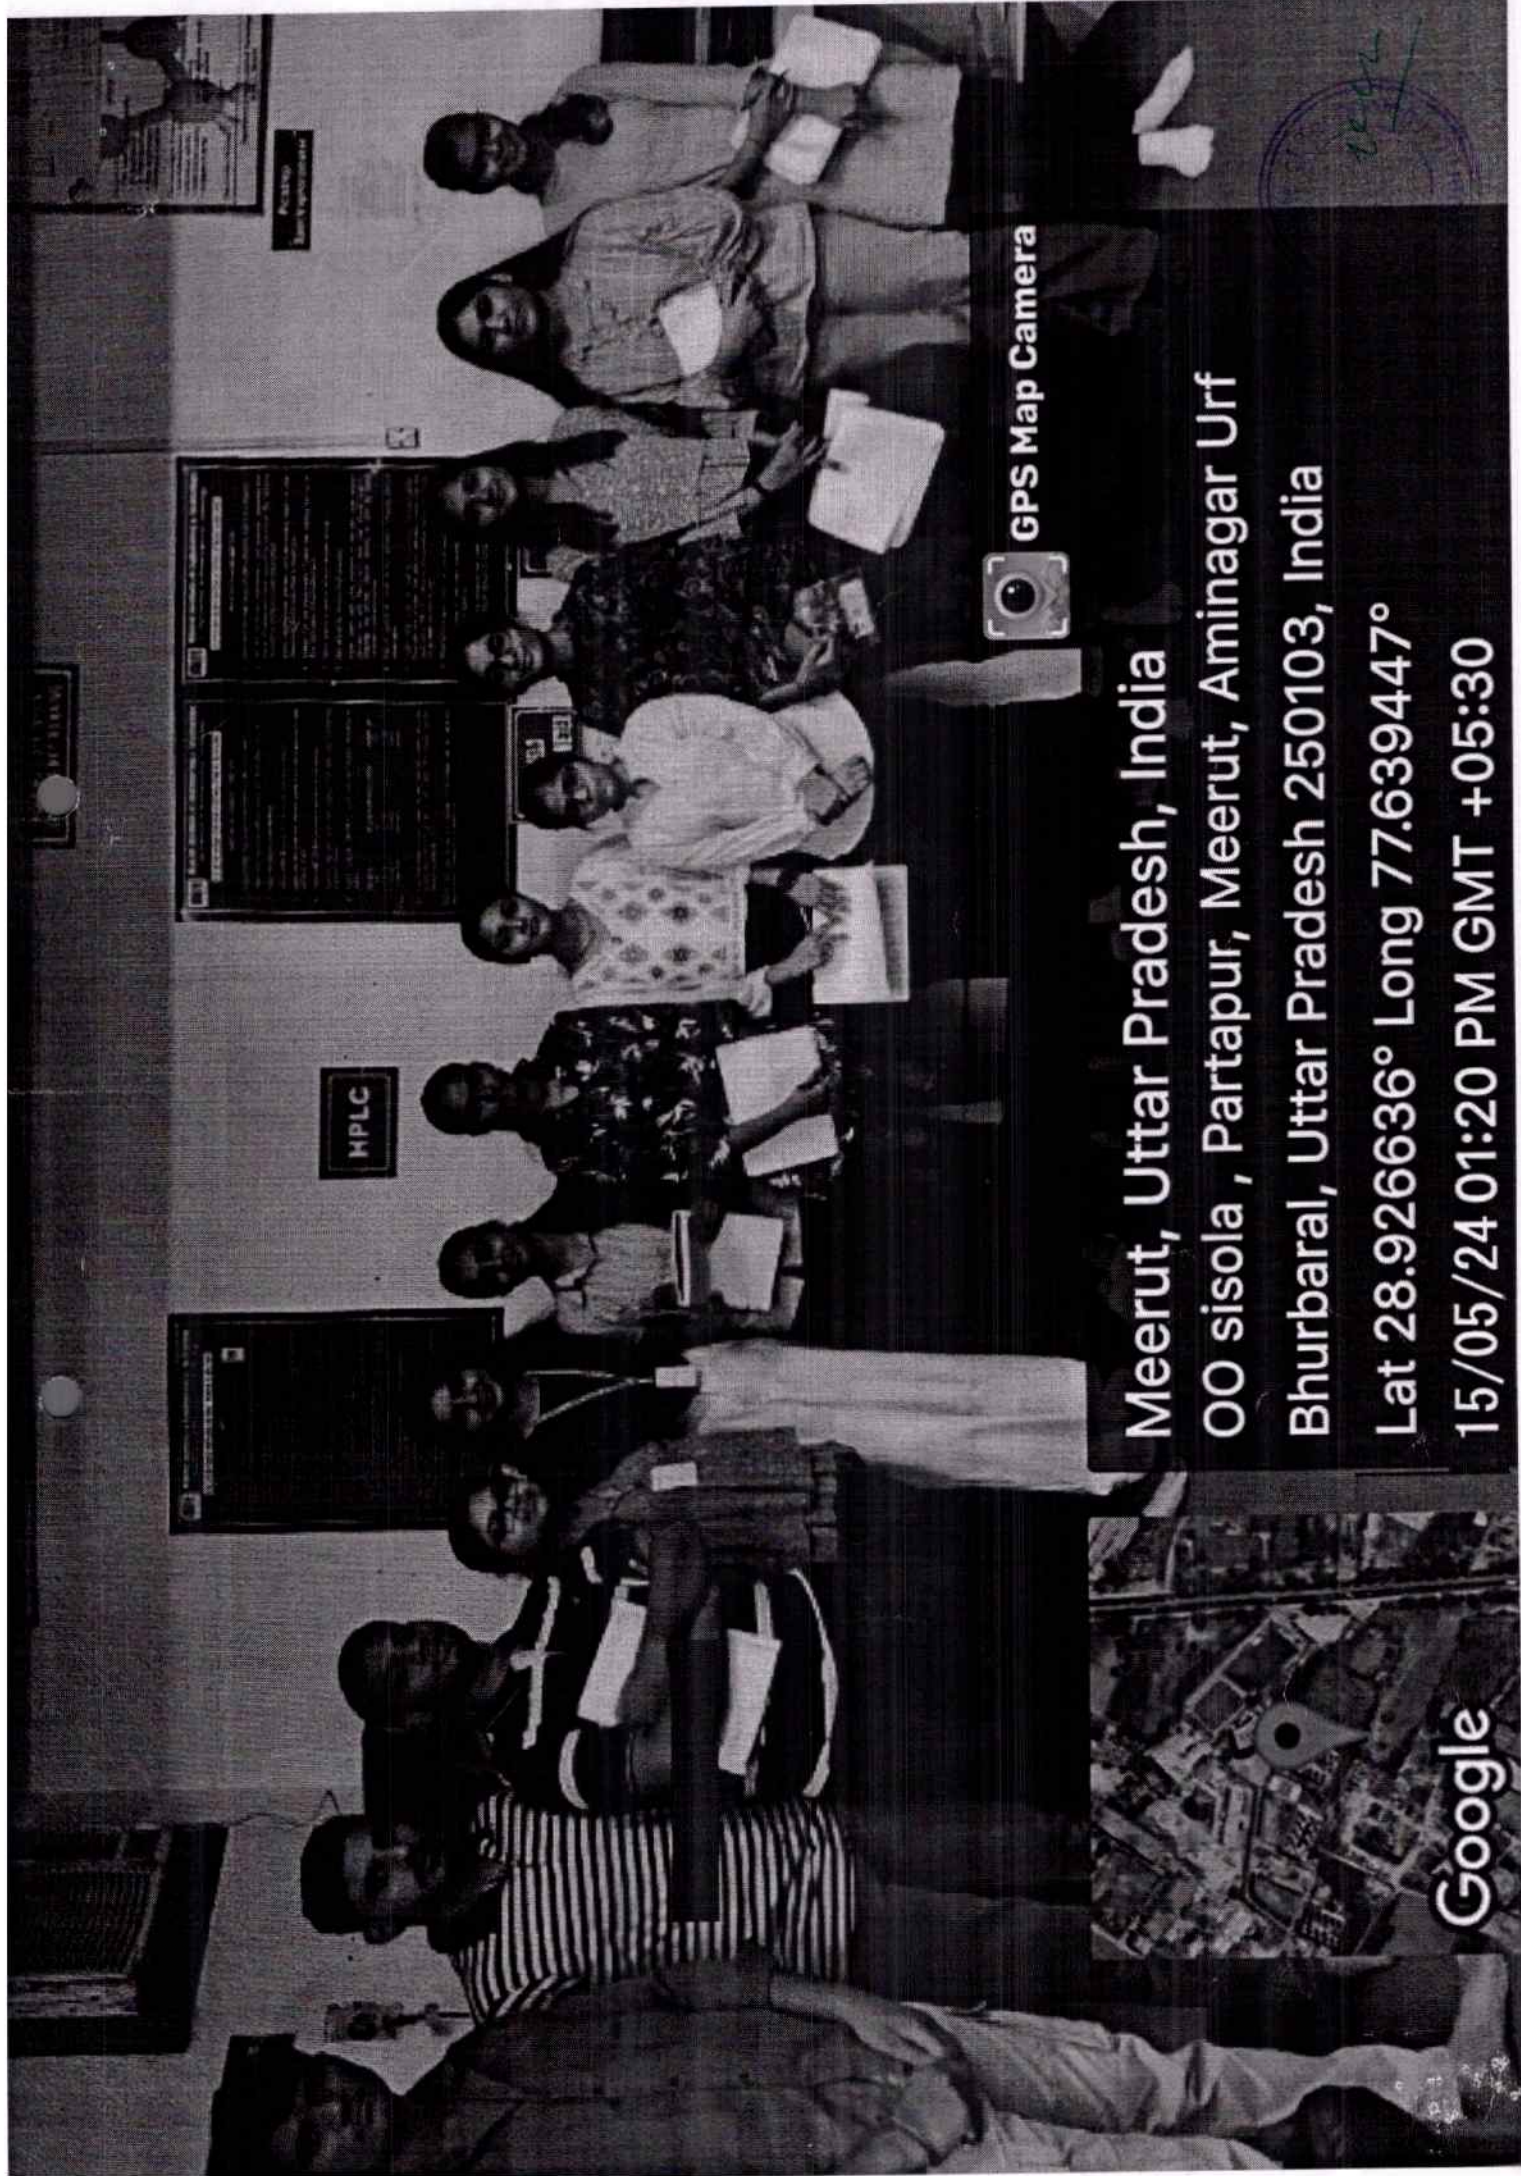

Interactive sessions, hands-on laboratory experiments, and real-world problem-solving exercises enriched the learning process. Expert-led discussions highlighted industry-relevant applications, ensuring participants are prepared to address contemporary analytical challenges. Feedback sessions revealed enhanced participant confidence in conducting precise and accurate analyses.

The training fostered a collaborative environment, encouraging knowledge exchange among participants and trainers. This initiative has empowered attendees to apply analytical techniques effectively in research, quality control, and industrial settings. We extend our gratitude to the facilitators, sponsors, and participants for their commitment and enthusiasm, ensuring the program's success.
