(2021-25 batch) 6th SEM

Procedure for Improvement of Slow and Advanced Learners

1. Tests given in class, interactions with students during lab viva, and the conclusion of each experiment are used to identify slow learners.

2. Once the slow learners have been identified, the subject teacher coaches them individually during additional classes.

3. For the purpose of clearing up any questions, students are summoned to the subject teacher's cabin (also known as cabin coaching) once a week (on Saturdays and during the teacher's spare time).

4. Both specific assessments and viva voce exams are used to evaluate these students. In special tests, students must score at least 60%, and in the viva vice test, they must provide appropriate answers.
