B TECH (SEM IV) THEORY EXAMINATION 2018-19 DATA STRUCTURES

Time: 3 Hours Total Marks: 70

Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt all questions in brief.

 $2 \times 7 = 14$

- **a.** What is asymptotic notation? Explain Big **Oh** notation?
- b. Given a 2D array A [-100:100,-5:50]. Find the address of element A [99, 49] considering base address 10 and each element requires 4 bytes for storage. Follow row major order?
- c. If the in order traversal of a binary tree is D, J, G, B, A, E, H, C, F, I and its pre order traversal is A, B, D, G, J, C, E, H, F, I Determine the binary tree?
- **d.** Evaluate postfix expression 8 2-4+5 6 $7-+\times$
- e. Explain collision resolution strategies used in hashing?
- **f.** Write a recursive solution to solve Tower of Hanoi problem.
- g. Define complete binary tree and full binary tree.

SECTION B

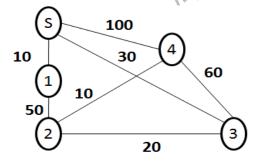

2. Attempt any *three* of the following:

 $7 \times 3 = 21$

a. Consider the following infix expression and convert it into postfix using stack

$$A + (B * C - (D/E-F) * G) * H$$

- **b.** What is doubly linked list? Write an algorithm to insert a node at begin in single linked list.
- c. Construct a Huffman tree for given characters A, B, C, D, E, F, G, H having frequencies 22, 5, 11, 19, 2, 11, 25, 5 respectively. What will be the code of HEAD in binary?
- **d.** Find the shortest path from S to all remaining vertices of graph using Dijikstra Algorithm

e. Use Heap sort algorithm to sort the following sequence {8, 5, 45, 24, 36, 11, 43, and 21}.

SECTION C

3. Attempt any *one* part of the following:

 $7 \times 1 = 7$

- **a.** What do you understand by time space trade off? How to analysis the time complexity of the algorithm in three different cases.
- **b.** What is circular linked list? Write an algorithm to delete a node from begin in single linked list.

4. Attempt any *one* part of the following:

 $7 \times 1 = 7$

- **a.** What do you mean by priority queue? Explain the types to maintain the priority queue in memory?
- **b.** Write an algorithm for conversion of an infix expression into prefix expression using stack?

5. Attempt any *one* part of the following:

 $7 \times 1 = 7$

a. Draw a binary tree with following traversals:

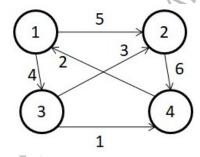

Preorder: ABCDEFGHIJKL
Postorder: CFEGDBKJLIHA

b. What is threaded binary tree? Explain two-way in order threading with suitable example?

6. Attempt any *one* part of the following:

 $7 \times 1 = 7$

a. Implement Floyd Warshall algorithm on the following graph.

b. What is transitive closure? What are the steps to obtain the transitive closure of a Graph?

7. Attempt any *one* part of the following:

 $7 \times 1 = 7$

- a. Describe an AVL tree. Construct an AVL tree by inserting the following elements in the order of their occurrence {60, 2, 15, 20, 12, 115, 90 and 88}.
- b. Show the results of inserting the keys F, S, Q, K, C, L, H, T, V, W, M, R, N, P, A, B in order into a empty B-Tree of order 5.
