**RCE402** 

Sub Code: RCE402

Printed Pages:01		
Paper Id:	900045	

Roll No.

### **B TECH** (SEM-IV) THEORY EXAMINATION 2018-19 **GEOINFORMATICS**

### Time: 3 Hours

3.

4.

5.

Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

### **SECTION A**

#### 1. Attempt all questions in brief.

- a) Define (i) Crab (ii) Drift
- **b)** Define Stefan-Boltzmann law
- c) Distinguish between satellite remote sensing & microwave remote sensing.
- d) What are Thematic Maps?
- e) Define cylindrical projection.
- f) Define Image filtering
- g) What is meant by undershoot and overshoot?
  - **SECTION B**

#### 2. Attempt any *three* of the following:

- a) A section line A B appears to be 10.16cm on a photograph for which the focal length is 16cm, the corresponding line measures 2.54cm on a map which is to a scale 1/50000. The terrain has an average elevation of 200m above mean sea level .calculate the flying altitude of the aircraft, above mean sea level when the photograph was taken.
- b) Describe the electromagnetic spectrum with neat sketch for remote sensing data.

a) What is tilt distortion? Prove that, in a tilted photograph, tilt distortion Is radial

b) Vertical photograph where taken from height of 3048m, the focal length of the

- c) Write a note on image enhancement techniques.
- d) What are the components of GIS? Explain.

Attempt any one part of the following:

Attempt any one part of the following:

Attempt any *one* part of the following:

from the isocentre.

e) Explain static, kinematic and differential GPS.

### **SECTION C**

# approaches to image enhancement and analysis.

what was the length of the airbase?what would be the scale of the print?

b) Write a note on supervised and unsupervised classification of remote sensed data.  $7 \ge 1 = 7$ 

a) Explain the process of principal component transformation and Fourier transform

#### Attempt any one part of the following: 6.

- a) How will you improve highway planning with the help of GIS? Explain.
- **b**) Give a detailed account an overlay analysis in GIS.

a) Explain the components of real Remote sensing System. **b**) Explain energy interaction with earth surface materials.

#### 7. Attempt any one part of the following:

- a) Explain in detail about UTM projection System.
- **b**) Write a note on GNSS and the advantages of GPS?

Page 1 of 1

 $7 \ge 1 = 7$ 

## Total Marks: 70

 $7 \ge 3 = 21$ 

 $2 \times 7 = 14$ 

 $7 \ge 1 = 7$ 

- $7 \ge 1 = 7$

camera lens being 15.24cm. if the prints were 22.86\*22.86cm and the overlap 60%,
